

Natural Resources

Ascot has brought together four key elements of power generation under one umbrella and one dedicated team, Natural Resources. We design and provide practical risk solutions for all facets of industry within the Natural Resources sectors, with particular focus on:

- Power & Utilities
- Renewable Energy (through Ascot Renewco)
- Mining
- Midstream & Downstream Energy

This complex sector requires a dedicated team of experts whose attention is focused on understanding the myriad of risk factors involved in these operations and staying ahead of the rapidly evolving technologies in use. Ascot's Natural Resources team has over 70 years combined experience across this highly technical sector. Drawing on our expertise allows us to provide our clients with the best, bespoke coverage and risk management solutions.

As a multi-line Syndicate we can offer broad coverage together with flexible conditions to address each client's unique needs. We offer genuinely tailored products, whether you are a small independent wind farm operator or a large multi-national power producer.

We pride ourselves on our high level of service, endeavouring to turn around all quotations within a short time-frame. As well as creative programme design, our Natural Resources team provides maximum accessibility for the broking community and travels extensively to better understand your individual business needs.

Our bespoke approach has made Ascot a recognised market leader in this class.

Natural Resources Team

Please contact one of our underwriters for more information on Ascot's Natural Resources products and services.
